7. Claims 1-2, 4-18, and 20-21 are pending.
8. Claims 1-2, 4-18, and 20-21 are allowed.

EXAMINER'S AMENDMENT

9. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Albert S. Penilla (Reg. No. 39,487) on 3/27/2008 to place the application in condition for allowance.

The application has been amended as follows:

In the Specification:

Replace the content of Cross Reference to Related Applications as following:

-- This application is related to U.S. Patent Application No. 10/803,585, filed on March 17, 2004, and entitled "METHOD FOR SHARING RUNTIME REPRESENTATION OF SOFTWARE COMPONENTS ACROSS COMPONENT LOADERS." The disclosure of this application, which is assigned to Sun Microsystems, Inc., the assignee of the subject application, is incorporated herein by reference. --

REASONS FOR ALLOWANCE

10. The following is an examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fail to teach, in combination with the other claimed limitations, performing a loader re-entrant interpretation of a bytecode of the method if the method is invoked, and prefixing an implementation of the bytecode of the method with a class initialization barrier upon a first use of the class, prefixing an implementation of the bytecode of the method with a link resolution barrier upon the first use of a symbolic link, and accessing one of a first loader dependent data and a second loader dependent data of the method of one of the first loader independent runtime representation and the second loader independent runtime representation being executed as recite in independent claims 1 and 17.

The closes cited prior arts, Bracha et al. (USPN 6,430,569) teaches a process for making a bytecode of a method sharable by a first class loader and a second class loader. However, Bracha et al. (USPN 6,430,569) fails to teach performing a loader re-entrant interpretation of a bytecode of the method if the method is invoked, and prefixing an implementation of the bytecode of the method with a class initialization barrier upon a first use of the class, prefixing an implementation of the bytecode of the method with a link resolution barrier upon the first use of a symbolic link, and accessing one of a first loader dependent data and a second loader dependent data of the method of one of the first loader independent runtime representation and the second loader independent runtime representation being executed as recite in independent claims 1 and 17.

These claimed limitations are not present in the prior art of record and would not have been obvious, thus all pending claims 1-2, 4-18, and 20-21 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
